COVID-19 Remobilization of the Membership Plan – Phase III

This plan has been developed for Georgia Wing, using the template provided by the Civil Air Patrol National Headquarters to enter Phase III, Resuming Overnight Activities.

Additional staffing and resources have been coordinated with Southeast Region, to cover gaps in this wing's available resources.

NOTE: *Deviations from the template are authorized, but should be coordinated by contacting the COVID-19 Planning Team at COVID-19Plans@capnhq.gov.*

Narrative Summary of Coordination and Events To-Date in GA Wing:

Georgia experienced the same spike of cases as the rest of the Nation and returned to Phase I on 3 JAN 2022. Our peak was 193.7 cases per 100K on 13 JAN 2022, and since then we have seen a constant decrease in since 25 JAN 2022. Georgia Wing returned to Phase II on 17 FEB 2022 with the metrics of new cases 28.3/100K and an infection rate of 0.56. As of 22 FEB 2022, Georgia Wing was at 20.2 cases per 100k and an infection rate of ~0.55 and was approved to return to Phase III. There are no occupancy limits for any food service establishments in the State and schools are meeting in person and all businesses are open to the public.

As this is a return to Phase III, GAWG has well established protocols for moving through the various Phases of Covid remobilization. On-going communication makes the transition between Phases seamless.

Georgia Wing will return to Phase III on 22 FEB 2022.

Phase III: Resuming Overnight Activities (Bivouacs, Conferences, Encampments, etc)

NOTE: Resuming overnight activities will not be done until Phase III, when most public health restrictions have been lifted, schools & businesses have reopened, and the forecasted risk is minimal.

Below are the phase III criteria:

- A four-week downward trend in the daily new case count metric (Federal resources have told us that trends that last this long are far less likely to reverse)
- Daily new case count number should ideally be at 30.0 / 100k population or lower
- Infection rate of 0.95 or lower
